Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 19-36, drawn to providing incentive for gathering data about a subscriber, classified in class 705, subclass 14.
- II. Claims 53-61, drawn to recalling advertisement to be displayed with another media content, classified in class 705, subclass 14.
- III. Claims 62 and 67-72, drawn to scheduling of content, with a promotional material associated with, on virtual channels and broadcasting the virtual channels, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing incentive for gathering data about a subscriber. This separate use distinguishes the invention of group I from group II & III since the feature of providing incentive for gathering data about a subscriber is not limitation of those independently claimed inventions. Therefore the invention of group I is a separately useable subcombination. See MPEP § 806.05(d).

Inventions II and I, III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as recalling advertisement to be displayed with another media content. This separate use distinguishes the invention of group II from group I, III, since the feature of recalling advertisement to be

displayed with another media content is not limitation of those independently claimed inventions. Therefore the invention of group II is a separately useable subcombination. See MPEP § 806.05(d).

Inventions III and I, II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as scheduling of content, with a promotional material associated with, on virtual channels and broadcasting the virtual channels. This separate use distinguishes the invention of group III from group I, II, since the feature of scheduling of content with a promotional material associated with it on virtual channels and broadcasting the virtual channels. Therefore the invention of group III is a separately useable subcombination. See MPEP § 806.05(d).

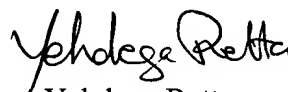

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
